II. *An Account of Mr Sam. Brown his Fifth Book of East India Plants, with their Names, Vertues, Description, &c. By James Petiver, Apothecary and Fellow of the Royal Society. To which are added some Animals sent him from those parts.*

These Plants were gathered at Salawacka and Keraputta Kaudoo, about 30 Miles from Madras, among Stony ground, Hills and Mountains, the colour of the Earth like rust of Iron: there are some moist places, but the ground is generally dry and hard.

Collected from the 23d of July to the first of August 1696.

1. pl. 2. id. p. 85. 2. *an Auricula Muris Camelli* Mfs.

The Flowers of this Plant are Blue, and not of a pale yellow, as Dr Pluknet asserts. The Decoction is good in Hætick Fevers, Consumptions, &c. Which the Hort. Malab. confirms, being boyl'd with Cummin.

181. *Pan-neer Marum Malab*

181.

Arbor Salawaccensis Catappæ Malabaricæ folio, flore extus fericeo.

These Leaves are roundish, large, and broadest towards the top, in shape very like the Katappers or Indian Almond mentioned by Nieuhof in his Itinerary: It is also very well described and Figured in the Hort. Malab. Vol. 4. Tab. 3 and 4. p. 5. under the Malabar name of Ada-maram or Saros.

The Flowers grow in Clusters Umbelwise, viz. several at the end of a long pedicle.

U u u u u

Is

Is about 8 or 10 foot high; thick as ones Arm. The Decoction of the Root, Leaves, Bark, &c. cures the Running of the Reins, and Sharpness of Urine. S. B.

Ray H. Pl. 1499. c. 22. Flor. Malab. 49. 3. id. fol. 12. 1. 6.

I wonder, since Dr Plukenet in his *Almagestum* Botanicum

Tab. 274. fig. 2. had given so good a Figure of this, yet when

he came to see it in this Collection, should so soon quite forget

it, as appears in his Mantissa pag. 39. where he not only gives

it a New name, but falsely makes it the *Belutta Kanelli* of the

5th Volume of the Hort. Malab. which is a different Plant.

This Tree is about 30 foot high, and about a foot diameter; The Fruit when ripe are dark purple almost black, as big as Grapes and taste like Sloes; they have a large Kernel or Core, which is not inclosed in a Shell, the taste of that is not pleasant,

sant, but harsh and bitter, therefore thrown away ; this *Kernel* is more than half the Fruit. The *Bark* of the Tree boy'd and the *Decoction* drank cures all *Fluxes*, also the *Dysentery* and *Gonorrhœa*. This *Fruit* is good to eat, and all over this Coast by *English* and *Portuguese* are call'd *Jambolins*: I believe they are the same that *Garcias* 236. and *Parkinson* 1636. call by the same name *Jangomas* I don't know, except it be the same with the *Mansanas*, viz. *Ber* and *Bor*. S. B.

N. B. The *Jambolins* of *Garcias* and *Parkinson* seem very different from this Tree.

185. *Peren-calla Malab.*

This differs from S. B. 62. in having its *Leaves* much larger, and sharp-pointed, some as big as Bay-leaves and as broad.

This is a bigger sort of S. B. 62. Its Vertue the same with that ; The *Fruit* of this is a pleasant acid taste, makes good sweet Meat and Gelly, altogether as good as *Currans*, they are of a fine Red when half ripe, and Black when full ripe: The *Natives* eat these greedily, but I cannot hear they use them in *Physick*: The *Natives* commonly call the *Fruit* Callacca. Some count *Pecala* S. B. 161. a *Species* of this. S. B.

186. *Shala-maraum Malab.*

Rus trifoliata facie Frutex *Salawaccensis* floribus Juliformibus *Mus. Petiver.* 678. an *Molago maram Malab.* Mirifato *Brach.* 678. Arbore da pimienta falso *Lusit.* Wild Peeper boom Belg. If Dr *Plukenet* has the aforesaid *Molago-maram*, as he asserts in his *Almag. Bot.* 94. pl. 7. he would be very kind to show wherein it differs from this and his *Jamaica* Plant, *Figured Tab.* 267. *Icon.* 4. tho in his *Almagest* p. 48. *lin.* 4. he confounds it under *Figure 1.*

Grows 10 or 12 foot high, thick as ones Arm. A *Drachm* of the Powder of the whole Plant taken, cures the Bites of a Venomous Horse-Fly, which the *Natives* call *Wandoo-gudee*; it's also good against the bites of other *Insects*. S. B.

Fig. 2.

This is the *Tamarind Tree*, whose Fruit is well known : it's a large Tree 40 or 50 foot high, and about 2 foot diameter. The *Natives* with the fume of the powder of the Root cures Piles and old Ulcers, the skin or rind of the Seed in powder is a most excellent Remedy in a Gonorrhea after purgation ; it also stops all sorts of Fluxes, and in Dysenteries infallible. A Decoction of the Leaves cleanses and heals green Wounds and Ulcers ; the Juice of the Leaves cures inflammations of the Eyes and Ophthalmias ; the Fruit is well known to temper the heat of the Blood, with the Leaves, which the *Natives* use in all their Diet. S. B.

60. 2. 27.

This is a Water Plant, when fresh in a minutes time after 'tis chewed, bites the tongue and mouth: A Decoction of this presently cures *Fevers*, *Coughs*, *Astma's*, *Hecticks* and *Consumptions*, they generally add to it a few grains of *Pepper*, the Flower is white, consists of 4 small Leaves. Grows in Ponds and Wells, and is not fixt to the ground at bottom by any stalk that I could find. S. B.

It seems to be a Plant, swimming or floating on the Water, as the *Hort. Malab.* and *Veslingius* observes theirs to do, it may therefore be easily carried by the Wind or Current from one side of a Pond to the other, like our *Duck-meat*.

214. Nommenau maram Malab.

S. B. 214.
Grows about 30 foot high, and 8 or 10 inches diameter. The Natives beat the Root, Leaves, Flowers, Bark and Fruit, and press out the Juice, which they boyl in Butter, and give a spoonful of it for *Hectick*, *Consumptions* and *Cough*, with success; these people think Butter helps the Vertue of Physick, Water not. The Flower is a complication of many threads on a stalk, which soon fall off. S. B.

This pod exactly resembles the *Waga Madraspatan. Sene foliis siliqua lata compressa ubi seminibus inflata* Mus. Petiver. 697. and Mr Browns description of the Flowers exactly agrees with it,

it, which makes me believe it the same; and if so, these *Walnut-like Leaves* must belong to another Tree. However, Dr *Plukenet* affirms them one, which if he can shew contiguous, I should be glad to see, viz. its Leaves with either Flower or Pod on the same Branch.

215. Punangunne Malab.

Perexil Madraspatana, foliis oppositis angustioribus Polygoni H. Un. 22. *Aff. 220. *Parpauticum Malab.*

Spergula Rosea multicaulis polyanthos e Madraspatan.

an Alfine Madraspat. Gallii foliis, flosculis communi pediculoter-nis Pluk. Tab. 128. Fig. 3. Alm. Bot. 21. 6. Dr *Plukenet*, to shew his fondness in multiplying species, will have this a *New Plant*, and to differ from the above-mentioned of his, because its stalk forsooth has changed colour, and he fancies this grows propt up, and therefore in his *Mantissa* p. 9. he thinks himself obliged to give it the 2 following names, that it may be known from his other, viz. *Alfine Saxifraga Indiæ Orientalis, foliolis circa caulem radiatis, flore herbido & muscoso; seu Alfine Spergula muscosa Indiæ Orientalis, surrecta cauliculis albicantibus*. What colour the *Stalks* of his first were he mentions not, but in these I am sure he is mistaken, for they are yellow, not *whitish*, and therefore it may probably be still the same as at first; and as for its growing *surrect*, (which signifies but raised, set or lifted upright) I see no difference between them; besides, it's hard to judge by a dry specimen whether it grew along the ground, or was lifted up; but grant this nice posture should make it distinct, I presume so small a peculiarity might not require so long a title, but be distinguish'd in fewer than 20 words, and those none of the shortest.

The *Decoction* is an excellent Medicine in *Hestick Fevers* and *Consumptions*, the Powder mixt with equal weight of *Sugar*, and taken a dram at a time, cures the *Cough* and *Astma* in a short space. S. B.

Tab. 119. Fig. 5. Alm. Bot. 245. pl. ult. *Coletta Veetla* Malab. Gontua Bram. H. Mal. V. 9. Tab. 41. p. 77. Fl. Pluk. Tab. 119. *Mal. 174. 5. id. Fol. 44. 1. 21. Kathu Kakarobiti Zeyl. Contafere* Fig. 5. Fl. Mal. 174. 5. id. Zurrat. fol. 44. 1. 21.

Grows a foot and half high: A Decoction of the whole Plant cures the *Dropsy*, *Ascites* and *Anasarca*, by provoking much Urine; a spoonful of the juice of the *Leaves* drank cures the *Thrush* or *Aphtha* (which the *Hert. Malab.* also confirms) it's also good in *Fevers*. S. B.

224. *Telle cootan Malab.*

Carambu Unaneercoondica Persicariæ folio. S. B. 224. Pluk. Tab. 203. Fig. 5. *Lysimachia non papposa humilis Maderaspata, Clinopodii Virgiani lutei foliis, fructu Caryophylloide parvo* Pluk. Tab. 203. 1. Alm. Bot. 235. Fig. 5. Alm. Bot. 226. 1.

Since which Dr Plukenet has thought it convenient to give it again as New in his Mantissa pag. 123. with the distinction of *Hyssopi foliis*, which makes me also believe it the same with his *Lysimachia spicata purpurea affinis Hyssopi foliis e Maderaspata*

tan Pluk. Tab. 203. Fig. 6. So that I fear he has made 3 Plants of one, for of near a Thousand I have seen from about Fort St George, I have yet met with but this one that has any resemblance to all his 3; and that it may not also be suspected to be a 4th he has, he would be kind to shew the Caramba Hort. Malab. V. 2. Tab. 49. p. 95. which he gives us in his *Almagest*. Bot. 235. plant. penult.

This grows a Cubit high, consisting of many straight branches, which rises at the Root, which is a Finger thick: the Decoction of this the Natives give to those that have a Fever with a Gonorrhœa, and great sharpness of Urine, all which it quickly cures; the two following Plants the Natives say are akin to this, but I think not. S. B.

S. B. 225.

225. Chedde Cootan Malab.

Althea Unaneercoondica floribus parvis ex alis foliorum dense stipatis.

Dr Plukenet in his Mantissa makes this a Tree Betony; and if so, it's the only one I ever yet saw of 2 foot high that was not verticillated, but bore its cluster of Flowers on one pedicle, distant from the Stalk.

It grows in very hard ground, 2 foot high; the Decoction of this cures a Gonorrhœa when the Urine does not scald. S. B.

226. Cootan Malab.

S. B. 226.

Pluk. Tab.

172. Fig. 2. an *Cuscuta baccifera* Barbadensium a *Maritimis* Pluk. Tab. 172. Alm. Bot. 126. Fig. 2. Alm. Bot. 126. 5. lin. 13. an *Cuscuta species crescens supra arbores & plantas* Comel. in H. This I don't know what to term, it has no Root on the ground, but draws its nourishment from hair-like Roots, here and there inserted in the branches of the Trees it lies on; ground with Butter-milk, and a small Cup of it taken night and morning cures the violent scalding of Urine and Gonorrhœa. S. B.

We now proceed to the ANIMALS which I have received from several parts of INDIA, viz.

1. *S* *Tella Chinenfis perelegans, dupliciter radiata.* Gazophylac. *S. B. 5. 1.*
nost. Naturæ Tab. 4. Fig. 6. *Gaz. nost. Nat. Tab. 4. Fig. 6.*

This has 13 round joynted rays, near 3 inches long, not bigger than a *Packthread*; these on the under part are thick set with a hairy fringe, between each of these larger *radii* comes another much smaller, smooth, about an inch long, and not bigger than a pin. This and the next *Mr Sam. Brown* some time since procur'd me from *China*.

2. *Stella Chinenfis tetradytton, capite pulchre venoso.*

S. B. 5. 2.

This has but 4 *rays*, which are like the last but shorter, viz. about 2 inches long, the head an inch broad, round, flat, and finely veined with reddish and white.

3. *Papilio Indiæ Orientalis permaximus nigrescens, micis cæruleis aspersis, subtus rubedine notatus.*

S. B. 5. 3.

This is the largest *Butterfly* I have yet seen, being full 6 inches between the tip of each Wing. I take this and the next to be Male and Female.

4. *Papilio Ind. Orient permaximus, e nigredine alboque mixtus, humero rubro pernotato.*

S. B. 5. 4.

This differs from the last, only in having a share of white on both sides its upper wings, and the Scarlet spot on the Shoulders are in this seen as well above as underneath. My curious Friend *Dr William Sherard* first gave me these *Butterflies*, I have since met with them in *Mr Goff's Collection*.

5. *Papilio Javanicus, subtus flavescens, venis nigris maculis miniaceis marginatus.* First brought me from *Batavia* by *Mr James Cuninghame*, since which my worthy Friend *Mr Edward Bulkley* sent it me from *Fort St George*.

S. B. 5. 5.

6. *Papilio Madraspat, medius, e flavedine & fusco mixtus, litura cærulea insignitus.* Gazoph. *nost. Natur. Tab. 4. Fig. 5.*

S. B. 5. 6.

This is a singular Fly, partly composed of yellow and brown, with a blue spot near the middle of each lower Wing towards the Shoulder.

Gaz. n. Nat. Tab. 4. Fig. 3.

7. *Papilio Ind. Orient. nigrescens, maculis pallidis umbra cærulescente aspersis.*

S. B. 5. 7.

8. *Papilio Ind. Orient. fuscus major, cæruleo notatus, subtus navius, bimaculatus.*

S. B. 5. 8.

Y y y y y

9. *Papi-*

- S.B. 5.9. 9. *Papilio* Ind. Orient. *medius, carulescentibus maculis, sub-
tus nœvinus.*

These 3 last came in *Mr Goff's Collections*, and they are the only ones I have as yet seen.

- S.B. 5.10. 10. *Papilio* Malaccensis *fuscus, subtus nœvinus, margine ocu-
lato.* Mr James Cuninghame caught this July 4. A.D. 1700. near Pulo Saya beyond Banca. I met with it also amongst Mr Goff's Insects.

- S.B. 5.11. 11. *Phalena* Ind. Orient. *minor fusca, maculis ex albo-caru-
lescente variantibus.*

- S.B. 5.12. 12. *Phalena* Ind. Orient. *minor albicans, guttulis sanguineis
Gaz. n. Nat. & nigris pulchre aspersis.* Gazoph. noll. Naturæ Tab. 3. Fig. 3.

I am also beholden to Mr Goff for these 2 beautiful Flies; I remember to have seen this last amongst Mr Charlton's most Curious Collection of Insects.

- S.B. 5.13. 13. *Buccinum* Bengalense an *fluviatile ovale, columella tri-
dentata, ore angusto*

Litt. Hist. This seems pretty well to resemble the *Buccinum quatuor or-
Conch. Lib. 1. bium valde crassum & ponderosum 2 dentibus ad columella, ore
Tab. 32. Fig. 30. admodum longo & angusto* *Litt. Hist. Conchyl. Lib. 1. Tab. 32.
Fig. 30.*

I first receiv'd this from the Bay of Bengale, and since that from Batavia.

- S.B. 5.14. 14. *Nerita* Javanica *nigrescens monogyros.* an *Litt. Hist.*
Litt. H. C. 2. Conch. Lib. 2. Fig. 37. Tab. 143. This very well resembles Dr
Tab. 143. Fig. 37. Lister's Figure, and seems to be a River shell.

- S.B. 5.15. 15. *Mytilus* Malaccensis, *striis crassis verrucosis.* an *Pectun-
Litt. H. C. 13. culus striis magnis & muricatis donatus* *Litt. Hist. Conch. L. 3.
Tab. 241. Fig. 78. Tab. 241. Fig. 78.*

The largest of these I have yet met with exceed not Dr *Li-
stern's Figure*, viz. 1 inch $\frac{3}{4}$ long, of which the long-notch hinge takes up 1 and $\frac{1}{4}$, it's just one inch over. I have had this Shell from Malacca, Batavia and Emuy; Mr Colvill, Surgeon, hath also lately brought it me from Pulo Verara.

- S.B. 5.16. 16. *Tridacna* Ind. Oriental. *ponderosissima & crassa imbricata.*

Tab. xi. Fig. 2, 3. The great waved Muscle Mus: Reg. Soc. 14. 7. 3.
*Mus. Reg. Soc. p. 147 3. lin. xi. For Bulk, Weight and Thickness it's the largest Shell I ever
Jonst. Amst. saw. Mr Charlton has a pair of these, which weigh near a hun-
Aq. ex. Tab. 13. dred.*

dred pounds. My Curious Friend Mr *Sylvanus Landon* brought me one of them from the *East-Indies*.

Aldrovand says it's call'd *Tridacna*, because the Fish is not to be eat under less than 3 mouthfuls, it has indeed but a small cavity, considering the largeness of the Shell.

17.. *Tridacna* Indix Orient. *triquetra, crassa, striata*. Con-
cha Indica Bonan. 109. Fig. 81, 82. *Pectunculus major variegatus, profundo sinu conspicuus* Liff. H. Conch. L. 3. Fig. 187 & 8.
Tab. 349 & 50. The Figures of the whole Shell in these 2 Au-
thors are too stiffly represented, but the single Valve pretty well
resembles it. Each large ridge is streakt with red, between which
are always 2 smaller. The forefaid Mr *Landon* brought me
this from the *Island of Princes*.

19. *Cochlea* Ind. Orient. *cinerea, lineis subrufis undatis*. an
Cochlea albida crebris lineis subrufis transversim & undatim ductis
depicta Liff. H. C. l. 4. S. 5. Tab. 559. Fig. 1.
S. B. 5. 19.
Liff. H. C. l. 4.
S. 5. Tab. 559.
Fig. 1.

My worthy Friend Mr *Walter Keir, Surgeon*, observed this
elegant Shell on the Coasts of India towards China.

20. *Cochlea* Bengalensis *alba, punctis fuscis*. an *Cochlea clavi-*
cula compressa, punctis rufis dense depicta Liff. H. C. l. 4. S. 5.
Tab. 564. Fig. 11.
S. B. 5. 20.

I first received this from *Bengale*, and since from *Malacca*, *Pu-*
lo Verara and *Emuy*.

21. *Cochlea* Emuyaca. *orbibus elatis, pulchre granulosis*. an
Cochlea striata & muricata Liff. H. C. l. 4. S. 5. Tab. 575.
S. B. 5. 21.

The *fascia* of these are flat and smaller, granulated then the next.

22. *Cochlea* Emuyaca *granulosa, ore serrato*.
S. B. 5. 22.

This is properly distinguisht from others by its serrated mouth,
which standing below the upper edge makes it seem a double
Shell. Mr *James Cuninghame, Surgeon*, observed this and the
last on the *Island Emuy* on the Coast of China.

23. *Cochlea* Malaccensis *fasciis maculatis elatis*.
an *Cochlea subviridis maculosa, striata, umbilicata* Liff. H. C. l. 4.
4. S. 5. Tab. 586. Fig. 45.
S. B. 5. 23.
Liff. H. C. l. 4.
S. 5. Tab. 586.
Fig. 45.

This Shell hath a small Navel, the inside Pearly, its *fascia* are thick set, spotted, and in some finely striated crossways, they are alternately big and less. Mr Charles Perry, Surgeon, brought me these amongst a Collection he made me in the *East-Indies*. I have observed one much larger from *Malacca*.

S. B. 5. 24.
G. z. n. Nat.
Tab. 4. Fig. 10.

24. *Cochlea Bengalenfis* ore lacerato, capite sinuoso. *Gazoph.* *noft. Nat. Tab. 4. Fig. 10.* an *Cochlea compressa fusca, fasciata, brevior. sinu longo ad rostrum notabili* *Lift. H. C. L. 4. S. 5. Tab. 577. Fig. 32.* an *Bonam. 167. Fig. 385.*

This is very remarkable for its ragged mouth and notch in the head. Mr Stocker brought me this from the Bay of *Bengale*, with a few other uncommon Shells.

S. B. 5. 25.
Lift. H. C. l. 4.
S. 6. Tab. 596.
Fig. 6.

25. *Nerita Malaccensis, nigris striis leviter fasciatus.* an *Nerita nigricans leviter fulcatus, clavicula parum compressa, multis & exiguis dentibus, ad labrum admodum paucis brevibus & acutis ad columellam* *Lift. H. C. l. 4. S. 6. Tab. 596. Fig. 6.*

The fasciated ribs of this are black, and the interstices Horn or Amber colour. Found on the Shoars of *Malacca* and *Emuy* by Mr James Cuninghame.

S. B. 5. 26.
Lift. H. C. l. 4.
S. 6. Tab. 596.
Fig. 4.

26. *Nerita Verara, ex albo-nigroque fasciatus, labro verrucoso.* an *Nerita admodum tenuis & levis, raris & profundis sulcis donatus iisque nigris, ipsa clavicula flavescente, 2 tribusve brevibus dentibus ad columellam, ad labrum omnino edentulus* *Lift. H. C. l. 4. S. 6. Tab. 596. Fig. 4.*

This and the next were brought me from *Pulo Verara* by my kind Friend Mr Colvil, Surgeon.

S. B. 5. 27.
Lift. H. C. l. 4.
S. 6. Tab. 598.
Fig. 11.

27. *Nerita Verara, ex albo nigroque fasciatus clavicula compressa.* an *Nerita magnus tenuiter striatus, ipsa clavicula & ore interno citrino* *Lift. H. C. l. 4. S. 6. Tab. 598. Fig. 11.* This differs from the last in having its clavicle Flat.

S. B. 5. 28.
Lift. H. C. l. 4.
S. 8. Tab. 617.
Fig. 3.

28. *Trochus ingens ex albo rubroque undatus, ex Insula Principis.* *Trochus pyramidalis maximus, late radiatus ex rubro* *Lift. H. C. l. 4. Sect. 8. Tab. 617. Fig. 3.* *Trochus magnus & auritus* *Bon. Purp. 14. c. 3. 125. Fig. 102.* *Turbo exoticus umbilicatus* *Col. de Purp. 14. c. 3. Fig. 16. Aldr. Fig. 16.* *Trochus alter pyramidalis* *Aldr. Bon. Test. 363. Fig. id. Bon. Test. 363. Francos. Tab. 8. p. 122. Fig. Trochus pyramidalis* *Jonst. Amst. Fig. id. Francos. Aq. exang. Tab. xi. an Trochus or the short Whirl Mus. Reg. Tab. 8. p. 122. Fig. Jonst. Soc. 133. I.* This is one of the largest Shells of this Family I have yet seen, its base being between 4 and 5 inches over. Mr Sylvanus Landon first brought it me from the *Island of Princes*, and

I have since received it from *Pulo Verara*, an *Island* in the *Straits* of *Malacca*.

29. *Trochus Malaccensis orbibus muricatis*. S. B. 5. 29.
Found in the *Straits* of *Malacca* by Mr *James Cuninghame*.

30. *Trochus Benghalensis clavicula longissima*. S. B. 5. 20.
Trochus pyramidalis fuscus, striatus, clavicula valde producta List. H. C. l. 4.

Cowrie.

I have received this from *Micowahi*, *Pulo Verara*, *Fort St George*, and other places in the *East Indies*; Mr *Barckley*, *Surgeon*, brought it me also from *Madagascar*. These Shells differ very much, both in respect to their magnitude and colour, some being

being clouded with dark *Fasciæ*, others have a pale list the length of the Shell on one side, with whitish spots interspersed amongst the Characters. The length of the largest I have met with has been 4 inches, and 2 the least.

S. B. 5. 34. 34. *Concha Veneris* Madagascara *albescens, oblonga, lineolis punctata, extremitatibus croceis.* *Concha Veneris cinerea, ventre candido, utroque capite croceo, dorso nigris lineolis & puncturis depicta* List. H. C. l. 4. S. 9. Tab. 660. Fig. 4.

Mr Sylvanus Landon brought me this first from the Island of Princes, and Mr Edward Bulkley hath since sent it me from Fort St George; but our worthy Patron Dr Lister hath long since had them from Madagascar and the *Maurushia's*.

S. B. 5. 35. 35. *Concha Veneris* Emuyaca *albida minor, levis, circulo croceo* Gazoph. List. Nat. Tab. 6. Fig. 8. *Concha Veneris* 4. Rond. Tab. 6. Fig. 8. *aquatil.* 102. c. 37. Fig. id Gallic. 68. Fig. c. 31. Aldr. Bon. Test. 555. Fig. id. Francof. 181. Tab. 17. Fig. 16. *descript.* p. 183. col. 1. lin. 41.

31. Aldr. Bon. This differs from the Guinea Gowerie Mus. nost. 19. in being smooth, and having a lastron circle. The references therefore to *Rondeletius* (whose Figure and description agrees very well with this) ought there to be left out, for I had not then seen this Shell.

Mus. Petiv. 19. 36. *Periscus Batavicus minor quin-dentibus dextris.* an *Buccinum* *Pericum parvum, sublividum, leviter ex fusco fasciatum* S. B. 5. 36. List. H. C. l. 4. S. xi. Tab. 803. Fig. 11.

Fig. xi. This agrees with Dr Lister's Figure in shape and bigness.

S. B. 5. 37. 37. *Buccinum* Emuyacum *parvum, fasciis striatis & nodosis.* These are about an inch and $\frac{1}{2}$ long, and $\frac{3}{4}$ broad, some of these have Teeth deep within the Mouth, others on the Lips, and some none at all.

S. B. 5. 38. 38. *Murex Orientalis, aculeis plurimis longissimis.* *Purpura echinata* Imperati Ital. Fig. 686. desc. 679. 4. lin. 31.
